

DREXELBROOK®**900 MHz Wireless I/O Extension Module****1 Analog Input, 1 Analog Output, 2 Digital wide-range inputs and outputs**

Model RAD-DAIO6-IFS // Part# 2901533-DRX

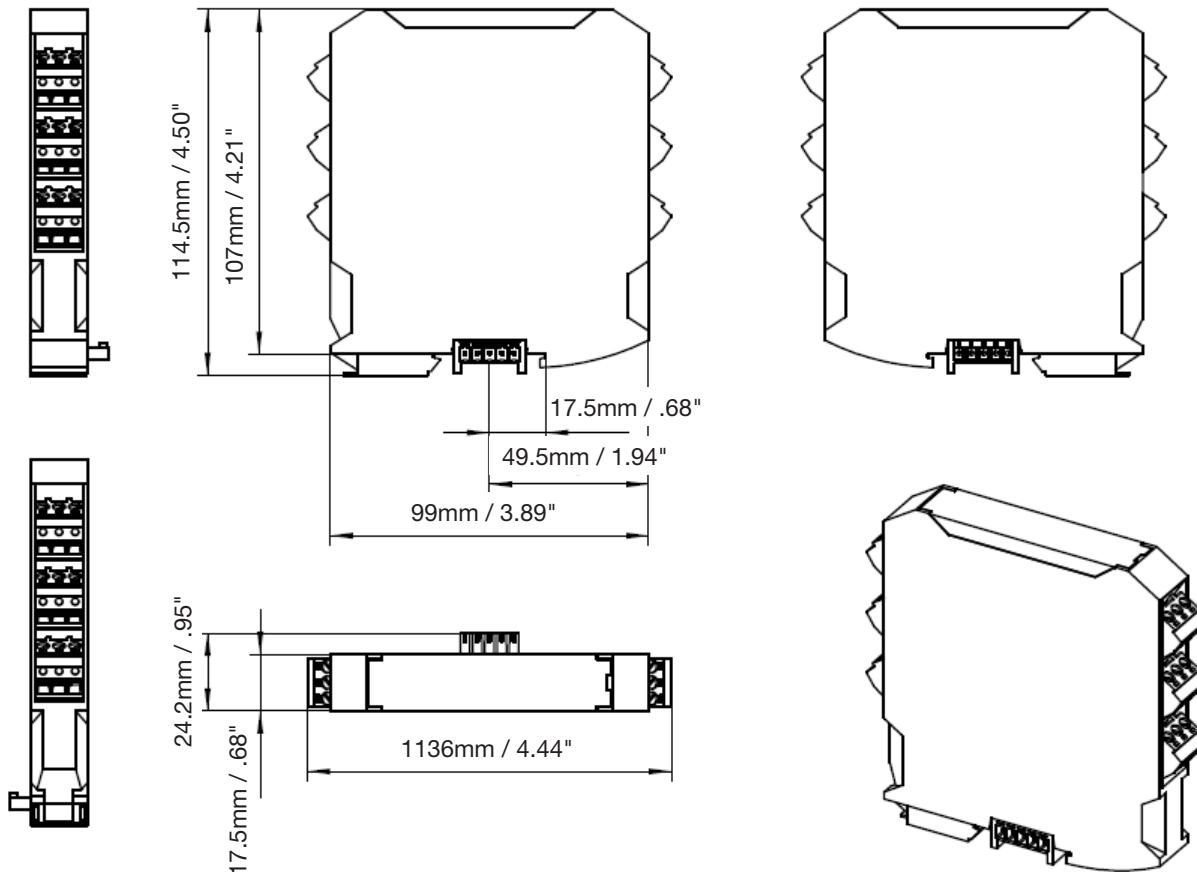

**FEATURES**

- Easy and tool-free I/O mapping via thumb wheel on the front
- Modular design via DIN rail connector (hot-swap capable)
- Channel-to-channel electrical isolation
- 2 digital wide-range inputs and outputs (0 ... 250 V AC/DC)
- 1 analog input (alternatively 0/4 ... 20 mA)
- 1 analog output (alternatively 0/4 ... 20 mA, 0 ... 10 V)
- 16-bit resolution of the analog inputs/outputs (accuracy < 0.02%)
- DIP switches for Hold or Reset behavior of outputs
- Loop-power function for passive sensors
- International approvals
- Installation in Ex zone 2

The RAD-DAIO6-IFS I/O extension module can be used in conjunction with Radioline wireless modules and other Interface System (IFS) master devices. In a station structure, you can connect up to 32 I/O extension modules to a wireless module via the DIN rail connector. The RAD-DAIO6-IFS analog/digital I/O extension module is used for processing two digital input/output signals, an analog input signal and an analog output signal.

900 MHz Wireless Transceiver

DIMENSIONS

900 MHz Wireless Transceiver

TECHNICAL DATA

DIMENSIONS		RELAY OUTPUT																																																																			
Width	17.5 mm	Number of outputs	2																																																																		
Height	113 mm	Contact type	PDT																																																																		
Depth	114.5 mm	Contact material	AgSnO ₂																																																																		
GENERAL			Maximum switching voltage																																																																		
Overvoltage category	II	Min. switching current	≥ 10 mA																																																																		
Mounting position	any, on standard DIN rail NS 35 in accordance with EN 60715		Max. switching current																																																																		
Degree of protection	IP20	Mechanical service life	1x 10 ⁷ cycles																																																																		
Degree of pollution	2	Electrical service life	2x 10 ⁵ cycles (At 2 A, 250 V AC, cosφ 0.4) 2x 10 ⁵ cycles (At 1 A, 24 V DC, L/R 48 ms)																																																																		
Type of housing	PA 6.6-FR, green	Maximum switching frequency	2 Hz																																																																		
Flammability rating according to UL 94	V0	Switching capacity	120 W (24 V DC) 120 W (30 V DC) 20 W (48 V DC) 18 W (60 V DC) 22 W (110 V DC) 40 W (220 V DC) 42 W (250 V DC) 1250 VA																																																																		
MTTF (mean time to failure) Telcordia standard 25°C temperature, 21% operating cycle (5 days a week, 8 hours a day)	889 Years	Behavior of the outputs (adjustable via DIP switch)	Hold / Reset																																																																		
MTTF (mean time to failure) Telcordia standard, 40°C temperature, 34.25% operating cycle (5 days a week, 12 hours a day)	391 Years	ELECTRICAL ISOLATION																																																																			
MTTF (mean time to failure) Telcordia standard, temperature 40 °C, operating cycle 100 % (7 days a week, 24 hours a day)	151 Years	Digital I/O	300 V (Rated insulation voltage (in each case between the digital inputs // digital outputs // TBUS supply, reinforced insulation according to EN 61010))			Supply voltage range	19.2 V DC ... 30.5 V DC (DIN rail connector)	Analog I/O	50 V (Rated insulation voltage (in each case between the TBUS analog inputs / analog outputs / supply, reinforced insulation according to EN 61010))	Max. current consumption	≤ 95 mA (At 24 V DC, at 25°C)	Digital/Analog I/O	300 V (Rated insulation voltage (in each case between the digital inputs and outputs and between the analog inputs and outputs, reinforced insulation according to EN 61010))	Transient surge protection	Yes	TEST VOLTAGE			ANALOG INPUT				Number of inputs	1	Digital I/O	2.5 kV AC (50 Hz, 1 min.)	Current input signal	0 mA ... 20 mA (can be set via DIP switches)	Analog I/O	1.5 kV AC (50 Hz, 1 min.)		4 mA ... 20 mA (can be set via DIP switches)	CONNECTION DATA			Max. current input signal	22 mA	Input resistance current input	< 70 Ω	Connection method	Screw connection	Precision	≤ 0.02 % (at 25 °C)	Conductor cross section, solid	0.2 mm ² ... 2.5 mm ²	Temperature coefficient, typical	typ. 0.0025 %/K (at -40 °C ... +70 °C)	Conductor cross section, flexible	0.2 mm ² ... 2.5 mm ²	Supply voltage	≥ 12 V DC (for passive sensors (via terminal PWR1, +!1))	Conductor cross section AWG/kcmil	24 ... 14	Resolution (bit)	16 bit	Stripping length	7 mm	Temperature coefficient, typical	typ. 0.0025 %/K (at -40 °C ... +70 °C)	Tightening torque	0.6 Nm	Behavior of the outputs (adjustable via DIP switch)	Hold / Reset			Protective circuit	Transient protection of outputs		
Digital I/O	300 V (Rated insulation voltage (in each case between the digital inputs // digital outputs // TBUS supply, reinforced insulation according to EN 61010))																																																																				
Supply voltage range	19.2 V DC ... 30.5 V DC (DIN rail connector)	Analog I/O	50 V (Rated insulation voltage (in each case between the TBUS analog inputs / analog outputs / supply, reinforced insulation according to EN 61010))																																																																		
Max. current consumption	≤ 95 mA (At 24 V DC, at 25°C)	Digital/Analog I/O	300 V (Rated insulation voltage (in each case between the digital inputs and outputs and between the analog inputs and outputs, reinforced insulation according to EN 61010))																																																																		
Transient surge protection	Yes	TEST VOLTAGE																																																																			
ANALOG INPUT																																																																					
Number of inputs	1	Digital I/O	2.5 kV AC (50 Hz, 1 min.)																																																																		
Current input signal	0 mA ... 20 mA (can be set via DIP switches)	Analog I/O	1.5 kV AC (50 Hz, 1 min.)																																																																		
	4 mA ... 20 mA (can be set via DIP switches)	CONNECTION DATA																																																																			
Max. current input signal	22 mA	Input resistance current input	< 70 Ω	Connection method	Screw connection	Precision	≤ 0.02 % (at 25 °C)	Conductor cross section, solid	0.2 mm ² ... 2.5 mm ²	Temperature coefficient, typical	typ. 0.0025 %/K (at -40 °C ... +70 °C)	Conductor cross section, flexible	0.2 mm ² ... 2.5 mm ²	Supply voltage	≥ 12 V DC (for passive sensors (via terminal PWR1, +!1))	Conductor cross section AWG/kcmil	24 ... 14	Resolution (bit)	16 bit	Stripping length	7 mm	Temperature coefficient, typical	typ. 0.0025 %/K (at -40 °C ... +70 °C)	Tightening torque	0.6 Nm	Behavior of the outputs (adjustable via DIP switch)	Hold / Reset			Protective circuit	Transient protection of outputs																																						
Input resistance current input	< 70 Ω	Connection method	Screw connection																																																																		
Precision	≤ 0.02 % (at 25 °C)	Conductor cross section, solid	0.2 mm ² ... 2.5 mm ²																																																																		
Temperature coefficient, typical	typ. 0.0025 %/K (at -40 °C ... +70 °C)	Conductor cross section, flexible	0.2 mm ² ... 2.5 mm ²																																																																		
Supply voltage	≥ 12 V DC (for passive sensors (via terminal PWR1, +!1))	Conductor cross section AWG/kcmil	24 ... 14																																																																		
Resolution (bit)	16 bit	Stripping length	7 mm																																																																		
Temperature coefficient, typical	typ. 0.0025 %/K (at -40 °C ... +70 °C)	Tightening torque	0.6 Nm																																																																		
Behavior of the outputs (adjustable via DIP switch)	Hold / Reset																																																																				
Protective circuit	Transient protection of outputs

Permissible humidity (operation)	20 % ... 85 %	Noxious gas test	ISA-S71.04-1985 G3 Harsh Group A
Altitude	2000 m	CONFORMANCE	
Vibration (operation)	in accordance with IEC 60068-2-6: 5g, 10 Hz ... 150 Hz	EMC directive 2014/30/EU	EN 61000-6-2; EN 61000-6-4
Shock	16g, 11 ms	Ex directive (ATEX)	EN 60079-0; EN 60079-15
OPERATING CONDITIONS FOR THE EXTENDED TEMPERATURE RANGE (+55 °C ... 70 °C)			
No function restrictions for the extended temperature range if you keep a minimum distance of 17.5 mm between the modules. The minimum distance is the width of a DIN rail connector. Otherwise please observe the following restrictions: <ul style="list-style-type: none"> - Do not use the analog loop-powered output (PWR1). - Only use the analog voltage output (U1). - Use two of the four possible digital inputs/outputs, maximum. Individual operating conditions on request.
